2. Albrecht (U.S. Patent 5,109,562) discloses an apparatus for cleaning the interior surfaces of a vessel which includes a cleaning head supported and guided into the vessel by a rigid air shaft. The cleaning head is supplied with a process fluid and directs and removes the process fluid from a cleaning zone located on the interior surface of the vessel. The process fluid is heated by a heat exchanger hose assembly that is connected to the air shaft. The apparatus utilizes turbulent fluid flow, thermal shock, ultrasonic vibration and/or piezoelectric vibration to dislodge particulates from the inner surfaces of the vessel.
